01 PROFILE UX/UI designer for accessible health, wellness, fitness & endurance products. I pair 20+ years of frontline technical support with two decades of endurance-sports coaching to design for real constraints — post-care states, low digital confidence, fatigue and glare. I own work end-to-end: research synthesis, IA, design systems, accessibility (WCAG 2.2 AA) and hi-fi UI — using Gen AI to move ~30% faster while every decision, trade-off and final output stays mine.

02 SELECTED WORK **OSTEÓPLUS** End-to-end UX/UI · 2025–present
DIGITAL HEALTH / REHABILITATION
PWA-first bilingual rehab product for post-op & chronic-pain patients (60+). Reframed a medical repository into an action-first “Today” dashboard; guest-first 3-step booking; safety-first patterns (Pain Interrupt, non-punitive streaks); accessibility-led design system — 39 components, 442 variants, WCAG 2.2 AA.

ATLAN PERFORMANCE End-to-end UX/UI · 2026
SPORTS & ENDURANCE TELEMETRY
Open-water performance interface for endurance swimmers & coaches. High-contrast pacing views built to stay readable under glare, fatigue & motion; a high-legibility “wet mode” theme; tokenized endurance design system. Grounded in 25+ years of real coaching.
